

## A2.4 Flexbox - Basic

### EXERCISE 1: Flexbox *Froggy*

Resolve the 24 Flexbox Exercises of <https://flexboxfroggy.com/> and insert the CSS lines you have written in this table:

1	justify-content: flex-end;	2	justify-content: center;	3	justify-content: space-around
4	justify-content: space-between	5	align-items: flex-end	6	justify-content:center; align-items:center;
7	justify-content: space-around; align-items: flex-end	8	flex-direction: row-reverse	9	flex-direction: column
10	flex-direction: row-reverse; justify-content: flex-end;	11	flex-direction: column; justify-content: flex-end	12	<b>flex-direction: column-reverse;</b> <b>justify-content: space-between;</b>
13	flex-direction: row-reverse; align-items:flex-end; justify-content:center;	14	order: 1	15	<b>order: -1</b>
16	align-self: flex-end;	17	order: 2; align-self: flex-end	18	flex-wrap: wrap
19	flex-wrap: wrap; flex-direction: column;	20	flex-flow: wrap column	21	align-content: flex-start
22	align-content: flex-end	23	flex-direction:column-reverse; align-content:center;	24	flex-direction: column-reverse; flex-wrap:wrap-reverse; justify-content:center; align-content:space-between;

### EXERCISE 2. Reproduce these flexbox layouts.

Given the HTML in the file **index-ex1-to-4.html**, add the CSS that is needed to get the following displays.

You can't modify the HTML! Only CSS!

DISPLAY 1.

CODE:

```
.container{  
  display: flex;  
}
```

DISPLAY 2.

CODE:

```
.container{  
  display: flex;  
  justify-content: space-around;  
}
```

### DISPLAY 3.

Give every item a width of 50px

CODE:

```
.container{
  display: flex;
  justify-content: space-between;
  align-items: center;
  flex-direction: row-reverse;
}
.container div{
  width: 50px;
}
```

### DISPLAY 4.

Give every item a width of 50px

CODE:

```
.container{
  display: flex;
  justify-content: space-between;
  align-items: center;
  flex-direction: column-reverse;
}
.container div{
  width: 50px;
}
```

## EXERCISE 3. Reproduce these flexbox layouts.

Given the HTML in the file **index-ex5-to-7.html**, add the CSS that is needed to get the following displays.

You can't modify the HTML! Only CSS!

### CODE:

```
.container{  
  display: flex;  
  flex-wrap: wrap;  
}
```

### DISPLAY 6.

CODE:

```
.container{
  display: flex;
  flex-wrap: wrap;
}
#i4{background-color: red;flex-grow:1;}
#i6{background-color: blue;flex-grow:1;}
#i9{background-color: green;flex-grow:1;}
```

## DISPLAY 7.

Canvia el contenidor a amplada 900px i alçada 150px.

CODE:

```
.container{
  display: flex;
  align-items: center;
}
#i3{
  order:-1;
  background-color: orange;
  align-self: flex-end;
}
#i4{
  order:-1;
  background-color: red;
  align-self: flex-start;
}
#i7{
  background-color: blue;
  align-self: flex-start;}
#i9{
  background-color: green;
  align-self: flex-end;
}
```

## EXERCISE 4. Reproduce these flexbox layouts.

Given the HTML in the file **index-ex5-to-7.html**, add the CSS that is needed to get the following displays.

You can't modify the HTML! Only CSS!

### DISPLAY 8.

Veure vidéo **video8.webm**

CODE:

```
.flex-container{
  flex-wrap: nowrap;
}
.flex-container :nth-child(3){
  background-color: red;
  flex-shrink: 2;
}
.flex-container :nth-child(5){
  background-color: blue;
  flex-grow: 1;
}
```

### DISPLAY 9.

Veure vidéo **video9.webm**

CODE:

```
.flex-container{
  flex-grow: 0;
}
.flex-container :nth-child(2){
  background-color: blue;
  flex-grow: 2;
}
.flex-container :nth-child(6){
  background-color: green;
  flex-grow: 2;
}
.flex-container :nth-child(10){
  background-color: red;
  flex-grow: 2;
}
```
